

Weekly Report (2017.11.20-2017.11.26)

TASK	DEADLINE	CURRENT PROGRESS
可视交互引擎论文	11 月底	目前进展：撰写内容，查找相关工作 存在问题：内容不够丰富，阅读论文速度太慢，不能很快抓到文章重点 计划：多读论文，抓取可以参考的内容，丰富自己的文章

Done

1) Paper writing: Each section is organized with introduction, items and summary. The introduction and summary part have already done and I still need to read more related work to make the items part more richer.

2) Paper reading:

Considerations for Visualizing Comparison. This paper aids designers by providing a strategy for considering the general issues for comparison. It presents four considerations that abstract comparison. Firstly, identify the comparative elements. Secondly, identify the comparative challenges. And then, identify a comparative strategy. At last, identify a comparative design.

Visualization beyond the Desktop ----- the Next Big Thing. I mainly reference to the content of this paper.

Some other works that searched by the keywords of my paper. Just skimming.

3) Course: This term I chose AI and VR to learn some fundamental content which maybe serve for visualization. The CG will go on. I choose to code a VR program which is one of the assignments. I think this will be very exciting, add a bit of fun to my paper-reading life. The AI and CG all ask us to write a report or a survey. What's more, the CG also need to code a specific program.

To Do

1) Write paper.

2) Finish the assignment for autumn term.
